

PICARRO

Solutions for the Natural Gas Market

The global leader in the measurement, quantification, and reduction of methane emissions.

Your Path to Net Zero

We provide natural gas operators around the globe with the most effective and proven path to net zero methane emissions, and actionable data through direct methane measurements.

We do this through a holistic solution to leak management by leveraging a single source of truth to address leak detection, emission quantifications and reduction, and pipeline replacement.

Picarro is the only solution on the market that combines advanced mobile leak detection and a data analytics suite giving you the ability to quantify, reduce and report your emissions performance over time and across your entire network.

- **Enterprise risk mitigation** - Actionable data means you can reduce risk, maximize quality and performance while adding value across the enterprise.
- **Measure everything** - Create a new source of truth with direct methane measurements scaled for your network.
- **Emissions reduction** - Find and remediate large emitters drastically improves safety and reduces your emissions footprint.

● **Santa Clara, CA**
HQ, R&D, engineering and manufacturing

Highlights

- ▶ **25+ years** of innovation
- ▶ Serving the gas industry **since 2012**
- ▶ **1000s** of Picarro instruments deployed worldwide
- ▶ **>40 PhDs** on staff with an extensive IP portfolio
- ▶ Pioneers of **CRDS**
- ▶ **100+ years** of combined gas operations expertise on the gas team alone
- ▶ **60+** double-blind studies since 2012 with more than 30 operators have validated our solution
- ▶ ISO 9001, ISO 27001, SOC2 Certified
- ▶ **30+ gas industry clients** around the globe in the Americas, APAC and EMEA

Global Presence

- ▶ United States
- ▶ Europe
- ▶ LATAM
- ▶ India
- ▶ APAC
